BERLIN • MARYLAND
THE WORLD'S GREATEST PEACH

The sensational Peach which has earned the greatest amount of favorable reports of any Peach introduced in a half century is that marvelous Rio-Oso-Gem, the World's largest, being a patented variety, U. S. Plant Patent No. 84. It has now been tried in all Peach-growing districts in the United States and Canada, and has definitely proved itself to be the best all-around commercial Peach. Ask any man who has grown the Rio-Oso-Gem and he will tell you:

THE BEAUTIFUL GLOREIFIED PEACH

This beautiful Peach has a brilliant, bright red color, running around 85%, good red, whereas they are easy to pack as U. S. Fancy grade. The size of the Peach is all that anyone can expect, as many of these Peaches will run a pound or more, in weight and in many instances, have been recorded, that the crop would produce three-quarters pound per Peach. The flaming, beautiful bright red color in the cheek, along with an attractive orange-colored background, has earned it an enviable reputation as being the prettiest Peach grown.

BEST FLOWRED COMMERCIAL PEACH

The unexcelled flavor is better than that of J. H. Hale and Elberta. The enticing flavor makes it a very popular Peach throughout the United States and Canada, and has definitely proven itself to be the best all-around commercial Peach. Ask any man who has grown the Rio-Oso-Gem and he will tell you:

RECORD BREAKER FOR LONG DISTANCE SHIPMENTS

The Rio Oso Gem is the best of all Peaches for long distance shipments and the fruit will stand up longer after being picked than any other variety of Peach in existence. This stupendous variety adapts itself exceedingly well for shipments in refrigerator cars pre-cooled, under standard refrigeration for transcontinental hauls. This is the greatest Peach for shipments on all types of cars, if cool, that anyone can expect. We have never frozen Rio-Oso-Gem Peaches which were picked and processed on September 1, 1944, which are still holding up in excellent condition.

RIO-OSO-GEM

Ideal for Home Orchards

Ripe 10 days later than Elberta. Rio-Oso-Gem is a very prolific bearer and dependable annual cropper.

RIO-OSO-GEM IS NO EXPERIMENT

Colonel and Mrs. Frank Sleeter, Round Hill, Virginia, wrote, "We have the land ready for the 800 Rio-Oso-Gem peach trees, 5 to 6 feet for the first year, and have had marvelous results marketing it last year at $7.00 per bushel, in spite of the low market price prevailing during the summer of 1949."

We have received several hundred complimentary letters highly praising the Rio-Oso-Gem Peach, U. S. Patent No. 84, from all over the United States, some of the typical remarks are from people such as Russell-Graham-Alderson Company, Forest City, Arkansas: "We have sold about 1,000 of Harrison's Rio-Oso-Gem Peach trees from which we have been harvesting the largest and prettiest Peaches ever. We sold our Elberta Peaches, U. S. No. 1 grade at about $2.50 per bushel and we had no trouble in picking the Rio-Oso-Gem Peaches 2 1/4 inches and up which we sold at $4.00 per bushel, f. o. b. Forest City, Arkansas."

Mr. H. Frank Smith, Proprietor, Hillcrest Orchard, Dover, Arkansas, writes: "This year's crop convinced me that the Rio-Oso-Gem, U. S. Plant Patent No. 84, is the very finest Peach and has certainly proven such with me. It has very fine qualities as a canner and people go wild about it. It always brings the highest prices for me."

Mr. Charles Heilig, Sewell, New Jersey, Gloucester County, said that the most handsome and the best Peach of the forty years experience that he has had was his first crop of Rio-Oso-Gem Peaches on 400 trees, three years old, from which he picked during early September 324 bushels and which he sold at an average price of $5.00 per bushel at his farm, grossing him more than $1,600.00 from this very young orchard. He bought 620 Rio-Oso-Gem trees for planting November, and said his future plantings would be Rio-Oso-Gem.

AMERICA'S MOST FAMOUS PEACH

Mr. E. R. Connor, fruit grower and broker, of Stephen City, Virginia, in the famous Frederick County fruit section, was exceptionally well pleased with his first crop of Rio-Oso-Gem Peaches on his three-year-old trees which he picked during early September. From his 400 trees, three years old, he picked a 220 bushel crop for which he was offered $2.75 per bushel, f. o. b. Stephen City, Virginia, for the entire crop, but he refused the sale so that he could sell the Peaches in smaller quantities at high prices to his customers throughout the Shenandoah Valley of Virginia and nearby cities. He planted 100 more trees two years ago which had a few Peaches on them this summer. Connor states he wishes he had 5,000 Rio-Oso-Gem Peach trees, U. S. Plant Patent No. 84, planted in his Orchard instead of 300.

RIO-OSO-GEM IS A "MUST" FOR EVERY GROWER

There are still big cash profits in Peaches, provided you grow the right varieties and in the near future you will see where the Rio-Oso-Gem, U. S. Plant Patent No. 84 will be getting more prominence each year. It is predicted that within a decade or so, it will be the most extensively planted commercial Peach in America.

Write Us About Your Planting Requirements.
PLANTED IN THIRTY-FOUR STATES

ORIGIN—This sensational new peach was discovered by Mr. Oscar F. Jones, near Crozet, Virginia in the famous mountainous Albemarle County section. He was manager for more than 30 years for the A. C. Bruce orchards, who planted many thousands of Harrison grown peach trees, starting in 1902. A life long horticulturist, he is a pioneer in one of the largest peach growing districts of the United States.

Tree—Large to medium. Vigorous and rapid growth. Spreading and under cropping conditions appears to weep. Dense, hardy. Very productive, bearing at an early age and carrying a load of fruit that commercial growers have estimated to be 20% greater than would be practical on an Elberta tree of similar size, since less pruning is required.

Trunk—Slender to medium. The wood is tough and not brash and has great flexibility. The bark resembles the Elberta.

Branches—Slender to medium. Rapid growth. The wood is tough and not brash and has great flexibility and tensile strength. Requires less pruning than the Elberta. When heavily laden, branches bend gracefully with a minimum of breakage.

Leaves—The foliage as compared to the Elberta is darker and larger. The leaves are rich dark green and average one inch longer and one eighth inch wider than the Elberta. Also the leaves are wavy to slightly crinkled with the edge coarsely serrated to almost smooth; obovate-lanceolate; base angle wide; glands reniform, 2-4 in number, inconspicuous, reddish brown.

Flower buds—The bud and blossom are more resistant to frost and freezes than the Elberta, the blossoms resembling the Elberta in color and conformation but are somewhat deeper in shade.

Resistance to: Brown rot—excellent. Experiments indicate that when any breakdown of cellular structure takes place, it is not usually in the form of a rot, but rather a gradual loss of moisture followed by shriveling.

Fruit—Large (from 23/4 inches to 3 inches), elongated, ovate-oval. Color yellow with blush and mottling of red color; quite attractive. Matura stage for a longer period than will the Elberta. Livered in perfect condition. The flesh fine grain and rich yellow with some red splashing towards the stone. Flavor—superior and rated as excellent by commercial growers, being distinctly aromatic and pleasing.

Quality—best. Stone: free, somewhat flat, roughly corrugated concentrically from the base, with base very narrow and tip sharply pointed. Size: smaller stone or pit than that of the Elberta.

Tendency to split: does not develop an inclination to split, thus eliminating the possibility of the bitter flavor frequently found in the Elberta peach.

Use: Commercial market, local, dessert, culinary, canning.

Keeping Quality: Excellent.

Excerpts of comments by Prominent Virginia growers

Mr. C. Purcell McCue—"Personally, I feel this peach will replace ELBERTA in this section."

Mr. C. E. Starkweather—"It bears larger, better colored peaches even with a heavier crop than the Elbertas do."

Mr. Oscar F. Jones—"THE HALE HARRISON BRILLIANT peaches came through with a minimum of injury while adjacent Elbertas were badly damaged."

Mr. Lee T. Carpenter—"If it proves out in tests as good as it is in its original habitat | consider it to be the greatest find since Elberta in the 1870's."

Mr. Charles H. Martin—"The parent tree of this peach is the largest and the most prolific | ever saw and when it is loaded with those large, uniform fruit, one hundred per cent colored it is a sight to be remembered."

Mr. Edward D. Daugherty—"I know something of the HALE HARRISON BRILLIANT and consider it a very unusual variety which will soon replace Elberta if properly distributed and advertised."

Mr. H. P. Rhodes—"The 500 Hale Harrison Brilliant peach trees | got from you and planted during November of 1949, that 196 are growing and have made a tremendous growth with dark green, healthy leaves and sturdy limbs. | was over to Crozet this summer and got three bushels of this amazing peach from Mr. Oscar Jones, they were off of the parent (16 years old) tree, which had probably twenty bushels which he sold off the tree for $4.50 per bushel. They were the most perfect examples of a very large, delicious firm peach | have ever seen. Will eventually replace Elberta. | want to plant another block, as | believe and all of the fruit men of Winchester, Virginia agree with me, that this peach is the answer to a fruit grower's prayer.

Mr. E. D. McGuire said—"After investigating | found that this amazing peach is just what | have been seeking for several years to grow instead of Elberta at Carbondale, Illinois." Mr. McGuire telephoned his order to express 700 Hale Harrison Brilliant peach trees 5 to 6 feet.
Dear Friends:

For sixty-seven years the business of the Harrisons' has been to grow Fruit Trees, Roses and Ornamental Nursery Stock, also commercial fresh fruit growers—a business this has grown and developed though a thorough understanding of the science of horticulture in all its phases with practical use.

Now when you buy nursery stock—remember all of it is a living plant—the pedigree, or parents, play an important part in the future results of the very tree you buy—the "hidden value" is the inborn inheritance that becomes the final quality, type, strain, size, color and productiveness so necessary in the future performance—and right here is the very feature which makes HARRISON grown nursery products have superior merits.

HARRISON'S Fruit Trees and Small Fruits are true to name, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

In closing, may we personally take this opportunity of thanking our many, many customers for their continued confidence, for which we are sincerely grateful.

Sincerely yours,

HARRISON BROTHERS NURSERIES

G. Hale Harrison, Gen. Mgr.

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name.

MARVELOUS NEW
Earliest Ripening Yellow Freestone Peach
Genuine
Schinn's Delicious
Trade Marked

Trees Grown and Sold Only By Harrison Bros. Nurseries

A true mutation, being very early ripening bud sport strain of Burbank July Elberta, U. S. Plant Patent No. 15, discovered by Mr. C. T. Shinn and Mr. L. S. Smith in their orchard near Russellville, Arkansas. Identical in large size, beautiful red color with handsome golden yellow background color, yellow flesh, freestone and superior flavor as its parent, however, its most appealing characteristic is that it ripens three weeks sooner, between Red Bird and Red Haven, making it about five weeks earlier ripening than Elberta. Every peach grower should make a planting of Schinn's Delicious this year. We know you will want more of them when you see the fruit. Schinn's Delicious (Trade Marked) is an exclusive Harrison variety and only genuine Shinn's Delicious trees can be obtained from Harrison Brothers Nurseries, Berlin, Maryland.

JULY ELBERTA
The Outstanding Medium Early Commercial Peach

Here is the peach that has caused a sensation wherever fruited. Growers in many sections say it is their best medium early, yellow, freestone peach for shipping, local markets and home use. Beautiful golden yellow, almost completely overspread with brilliant red. Ripens about the same time as Hale Haven, but on account of its vivid red color and yellow background with no green color, it can be picked for commercial shipments about four days sooner. Excellent in flavor, even superior to Hale Haven for fresh eating, freezing and canning. Hardy, sure cropper, large size, a sensational money maker. July Elberta is known by different names, such as Burnett Elberta, Burbank July Elberta, Kim Elberta, Burbank Elberta. We offer an outstanding strain selected from bearing trees. Season of ripening about two weeks sooner than Elberta (Original Strain).

TRIPLE CERTIFICATION

BUD-SELECTION
THE KEY TO BETTER FRUITS

Harrisons' "Bud Strains"
Some sixty years ago, and almost every year since, Harrisons have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "family" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding stocks for future orchards in America and true-to-name varieties were assured.

This is Your PROTECTION
Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within two months after its arrival.

HARRISONS' NURSERIES.

OVER FIFTY YEARS DEPENDABLE DEALINGS.
Biggest Peach Tree Values in America

HERE'S A "LOAD" OF REASONS WHY HARRISONS' PEACH TREES ARE BETTER

A—Our organization has over 65 years' experience.
B—Every step in growing under the personal supervision of the Harrison Brothers.
C—One hundred and fifty thousand trees in Harrison Brothers orchards from which our propagating trees are selected.
D—Use of modern methods for planting, cultivating and digging.
E—Over 4,000 acres of various types of soil.
F—Ideal soil and climatic conditions.
G—Co-operation with leading horticulturists and experimental stations all over the world.

Very Early Varieties

DIXIRED. Very early, yellow, cling, medium size, round, bright attractive red blush; good flavor; prolific bearer. Ripens two weeks earlier than Golden Jubilee or about three days later than Red Bird. A new variety originated and introduced by the U. S. Department of Agriculture. Its most outstanding commercial feature is that it is a good shipper and has been planted extensively in Georgia to meet the demands for the very early Peach market.

DIXIGEM. Early, yellow, semi-freestone, red blush, medium size, good quality. Ripens a few days sooner than Golden Jubilee. A new variety originated and introduced by the U. S. Department of Agriculture. Extensively planted in Georgia.

FAIRHAVEN. Early, yellow, freestone, medium large, nearly round, mostly bright golden in color with an attractive bright red cheek. Skin is smooth and very tough. Fruit very firm and ships exceptionally well. Ripens just after Golden Jubilee.

JERSEYLAND (N. J. 135) — Ripens a week sooner than Golden Jubilee, large, firm, attractive yellow flesh, freestone. Tree is hardy, sets buds freely. Introduced by New Jersey Experiment Station.

JUNE ELBERTA. A big, handsome red and gold Peach, highly colored, excellent quality and a dandy home Peach, being a new variety. One of the earliest of the good yellow-fleshed Peaches, this semi-freestone variety quickly returns cash dividends before later varieties reach the market.

HARRISONS' HARDY PEACH TREES

We absolutely guarantee Harrison-grown Peach trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

HARRISON—A Name in Trees You Can Trust
The Sensational REDHAVEN
Tops All Extra Early Peaches, Earliest Yellow Freestone Peach
THE NEW EARLY RIPENING YELLOW PEACH THAT RIPENS ABOUT 10 DAYS BEFORE GOLDEN JUBILEE
The most promising early ripening yellow freestone Peach ever introduced. A cross between Hale-Haven and Kalhaven made at the South Haven, Michigan Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Ripe without it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

HALE-HAVEN
Early midseason. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on rich color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the tree, its flavor is undoubtedly the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening just after Golden Jubilee and should be planted in every orchard. Excellent for fresh eating and quick-freezing.

GOLDEN JUBILEE PEACH—Yellow, Excellent Quality
A GREAT PEACH COMBINATION—REDHAVEN, GOLDEN JUBILEE, HALE-HAVEN

HARRISONS' HIGHER QUALITY FRUIT TREES BEAR HEAVIEST GROW FASTEST AND LIVE LONGEST
**Stark Early Elberta**

Midseason. Yellow, freestone, large, lemon-yellow with a dark cast, blushed with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor; rich golden tender flesh; yet firm and has a delightful flavor; excellent for canning. Gleason strain which ripens three days earlier than Elberta.

**TRIOGEM (N. J. 70)**

Developed by the Master Plant Breeders of New Jersey.

**MEDIUM TO LARGE, FIRM, ATTRACTIVE**

Ripens early, medium to large, oval, firm, high quality, high red color over entire Peach, yellow flesh, freestone, smooth, nearly fuzzless like J. H. Hale, one of its parents; colors several days in advance of its ripening, being 2 days later than Golden Jubilee, or 3 weeks earlier than Elberta. This, combined with its very slow rate of softening, makes it an ideal Peach for commercial growers. Hangs well to the tree after the Peaches become firm ripe. When picked hard to firm it is a good long distance shipper. This is the best commercial Peach ripening at this period, and is being planted now by some growers in preference to Golden Jubilee. Considered as the best new variety of Peach so far originated and introduced by the New Jersey plant breeders.

**A REAL PROFIT MAKER**

TRIOGEM has been fruited commercially in New Jersey and Maryland for several years. During this time it has topped all varieties in price on the New York and Philadelphia markets which ripen at this time during the summer. Several large commercial orchards have been planted with Triogem and its popularity is increasing each year.

**CHAMPION. A Good Home Peach.** White, freestone, very large; creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive. Ripens ten days earlier than Elberta.

**REDSKIN.** A new variety introduced by the University of Maryland. Midseason, yellow, freestone, large, round, deep red blush, firm flesh, sweet flavor. It is a cross between J. H. Hale and Elberta, which ripens slightly earlier than Elberta. Vigorous, good growing tree and productive.

**VEDETTE.** Early yellow freestone. Globular; large; good red color; good flavor. Canadian variety of the Elberta type. Ripens about six days later than Golden Jubilee. Adapted to Southern as well as Canadian Peach districts.

**SUNHIGH. (N. J. 82.)** A large, red, bright, smooth Peach which colors well all over before it ripens, softens slowly, making it a good commercial Peach. Flesh inclines to adhere to the pit when hard ripe. The variety seems to do best in hilly sections and requires thorough summer spraying. The fruit is large, roundish, thick-skinned, very uniform in size. Color deep yellow with red cheek. Stone is free. Ripens approximately 18 days before Elberta, at a time to bring high market prices.

**HILEY.** White. Early midseason. Bears huge crop of fancy Peaches. Freestone, medium size, highly red colored and is a very handsome Peach of exceptionally good flavor. Tree is strong grower, very healthy, and an extra heavy bearer. You can depend on Hiley to bear heavy crops every year. The marvelous color and wonderful flavor have made it popular on the markets. Hiley resembles Belle of Georgia but ripens about 14 days earlier.

**SOUTHLAND.** Early midseason, yellow, freestone, medium to large, round, attractive red blush with mild, good flavor. Originated by the U. S. Department of Agriculture, being an ideal peach for the extreme Southern peach Belt. Vigorous tree, productive and fruit ripens at the same time as Hiley. Promising commercial peach.

**SUMMERCREST. (N. J. 94.)** Midseason, yellow, freestone, large with red blush and sweet flavor. Trees exceptionally vigorous, fruit ripens the same time as Belle of Georgia, which is a few days earlier than Elberta. Popular in New Jersey where it is known.

**GOLDEN EAST. (N. J. 87.)** Early midseason. Very large, high red color, yellow, freestone. Very good flavor. Ripens 15 days earlier than Elberta. Good roadside market and commercial Peach.

---

**HARRISON'S Peaches ARE A COLLECTION OF THE WORLD'S BEST**

For Greater Profits From Your Land Plant Trees
Original Strain
J. H. HALE

Our 'Hales' are propagated directly from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Elberta or Hiley or any other variety of Peaches along with Hale for cross-pollination.

Extra Large Size
Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta.

HARRISON BROTHERS NURSERIES
BERLIN, MARYLAND

Belle of Georgia
The Queen of Flavors

THE BEST WHITE MID-SEASON VARIETY

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards, and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best and endorse it highly.

SULLIVAN EARLY ELBERTA
An Early Ripening Red Bud Sport of Elberta

Here is the early ripening strain of original Elberta growers who have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about seven days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

10 OUTSTANDING REASONS FOR PLANTING SULLIVAN EARLY ELBERTA
1—Size: Large to Extra Large.
2—Yellow Freestone.
3—Rich, Sweet Flavor.
4—Brilliant Red Colored with Golden Yellow Background. Excellent Long Distance Shipper.
5—Tree Vigorous Grower.
6—Bears Large Crops Annually.
7—Colors a Week Earlier Than Elberta.
8—Ripens Slowly After Being Picked.
9—Brings Highest Market Prices.
10—Completely Tested.

Harrisons' Maryland Grown Peach Trees are the Finest Quality in World
Greater Profits from Harrisons' Original "BUD" Strain

Plant Harrisons' Superior Strain and Reap the Cash Benefits

Sensational Standard Peach of the World

It's the Greatest Money Maker

(Original Strain) ELBERTA

Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only Harrisons' Original Strain Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of $1.00 to $2.00 per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrisons' heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

FOR NEW LOWER PEACH TREE PRICES SEE PAGE 5

ELBERTA Original Strain America's No. 1 Peach—Elberta. There are more Elberta Peach trees in bearing than any other variety on earth. FOR JUMBO PEACH TREES,

Brackett

Mid-Season Late

A Profitable Commercial Variety Slightly Later Than Elberta

Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past thirty years we have planted many thousands of this variety in our own orchards and they have given good results.

The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta. Good shipper.

Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know the grower who needs a Peach ripening slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrisons' Original Strain

HARRISONS' were the first to popularize this great variety and distribute it throughout the Peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.
Late Ripening Varieties

LATE ELBERTA. (Gemmer's Late Elberta.) Late, yellow freestone, large, high-red-color, fine quality, good shipper. It is a typical Elberta in fruit and tree characteristics, but ripens 4 to 5 days later than Elberta of the original strain.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 14 to 16 days later than Elberta, having same prominent coloring characteristics as its parent.

Harrisons' Maryland Grown Peach Trees are the Finest Quality in the World.
A WHOLE ORCHARD
FOR ONLY $2.50

Five Varieties of Apples for Fresh Eating from Late June Until Early November produced on the same tree

Here's the opportunity for those with limited space to have five mighty desirable varieties of Apples, all budded on one tree for a little more than the cost of one tree. Requires only 20 ft. space when fully grown. Each tree is budded to Large Transparent for first summer variety, Williams Early Red, Red Gravenstein, Triple Red Delicious and Yellow Delicious for autumn varieties, Scarlet Red Stayman and Red Rome Beauty for winter varieties.

Budded to 7 varieties, however, guaranteed to have 5 or more.

2 year, 4 to 5 feet, well branched at $2.50 each.
2 year, 5 to 6 feet, extra well branched with good heads, at $3.25 each.
Jumbo Size, 3 year, 6 to 8 feet, extra well and heavily branched with beautiful heads at $4.50 each.

If Your Space Is Limited
Plant one or two of these novel trees. You will have a variety of Apples maturing over a long season. Desirable as an ornamental and shade tree, as well as for its fruit.

Grow Your Own DELICIOUS! NUTRITIOUS
ASPARAGUS It's Easy with
Harrisons' "Big Yield Strain"

MARY WASHINGTON
Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

New Gigantic Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does not send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do not remove the tender skin; it cooks right up with the stalk.

Heavy plants: $1.00 each; 6 for $5.40.

WILLIAMS' EARLY RED

The Big Red Home or Market Apple

Just at the time when people are hungry for a fresh, new red Apple, this superb sort comes into market. In New York, Boston, Philadelphia, and other eastern cities as well as middle western and southern cities, the fruit sells as quick as it hits the market-house or dealer’s store. It holds its own anywhere and has proven to be:

The Best Summer Apple

The rich bright red fruit catches the buyer’s eye and is ordered at a price that yields the grower a good profit. Apple is large, with tender, crisp, white flesh, juicy, slightly tart. The trees come to bear when quite young, producing freely and steadily. Fine for a filler or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All orchards should include this variety.

A good pollenizer for Red Yolking and Red Rome Beauty Apple trees.

SUMMER APPLES

LARGE TRANSPARENT (Lodi)
A New Summer Variety

Ripens Very Early—Destined to Replace the Ever-Popular Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type. Somewhat of a dwarf grower, bearing very early, it makes an excellent filler. The skin is a clear, yellow, white flesh, of medium size.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that’s what we mean. It can be done—here’s how: Yellow Transparent Apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easy on its big brother, “Large Transparent,” which ripens at the same time. Large Transparent Apples average up to ½ inch larger than Yellow Transparent—this means $1.00 to $2.00 per bushel extra.

OTHER SUMMER APPLES

STARR. Large, attractive with bright yellowish, smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

DUCHESS OF OLDENBERG. Large, striped, tender, juicy, sub-acid, good; regular and abundant bearer. One of the hardest. Best pollinizer for early blooming varieties.

TWENTY OUNCE. Very large, fine quality, yellow striped red

WEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained, tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates; vigorous, fruits at early age; bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

EARLY McINTOSH. Resembles its McIntosh parent in appearance, but a less aromatic. An attractive, uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually if thinned early and severely. The shape and framework of the tree, especially the heavy-budded branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

RED SUMMER RAMBO. A new earlier coloring solid red strain means much greater profits for growers everywhere

SUMMER RAMBO. Large, splashed with red

EARLY RED DUCHESS. Highly colored early Apples bring premium prices, this bud sport colors red all over early in the summer. Excellent pollenizer for Red Gravenstein.

YELLOW TRANSPARENT. Medium size, greenish yellow, very heavy bearer. Most widely planted yellow variety

To Make One Tree Do the Work of Two, Plant Harrisons’ Bud-Selected, Heavy-Bearing Strains.
WINESAP

An Apple favorite in Virginia. Sometimes called Old Northwestern Greening. Large, round, greenish yellow; juicy, firm, crispy, and aromatic. Tree large, vigorous and reliably productive.

NORTHERN SPY

Large, bright scarlet-red, with yellow markings. Flesh tender, crisp, aromatic and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower, comes into bearing early. Our strain produces bumper crops of the larger sized Apples with plenty of color.

YORK IMPERIAL

Medium to large size, round, irregular, greenish yellow overlaid bright red; flesh tender, crisp, of high flavor; wonderful keeper. Keeps in cold storage until June. Vigorous grower, strong and healthy; an unusually heavy bearer.

MAMMOTH BLACK TWIG (Paregon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinator.

NORTHERN SPY

Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong erect grower, very healthy, extremely hardy and a free producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age.

NORTHWESTERN GREENING.

Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive Apple when packed in bushels, demands good prices, excellent baking Apple. Should not be planted extensively because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RODE ISLAND GREENING.

The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel Apple, brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of New York, Michigan or southern Canada. Early variety, bearing until July. Strong grower, comes into bearing early. Our strain produces bumper crops each year. Generally considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

McINTOSH RED

Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North. Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull striped kinds. If you do not have sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

OTHER GOOD APPLES

DOUBLE RED BALDWIN. A new dress for this old reliable variety. Solid deep red color, much earlier than ordinary Baldwin. The color makes it sell better. This new strain will bring new profits to the grower of Baldwins. Late fall.

CORTLAND. A new variety resulting from crossing pollenization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red Apple, approximately the same size and fine flavor of the McIntosh, but ripens 3 weeks or a month later. Good keeper.

GALLIA BEAUTY. A Rome Beauty type of Apple identical in every respect except its earlier color. It can be picked 2 to 3 weeks earlier than ordinary Baldwin. The color makes it sell better. This new strain will bring new profits to the grower of Baldwins. Late fall.

SPARTAN—A cross between McIntosh and Yellow Newtown, very worthy of a trial planting.

CRAB APPLES

HARRISON'S MARYLAND GROWN APPLE TREES

are the Finest Quality in the World

For Real Profit Plant Harrisons' Selected Strain Trees

Scientifically Propagated by America's Best Fruit Tree Growers
NEW BRIGHTER

7. Completely Tested.
8. Excelled by No Other Red Bud Sports or Strains.
10. Greatest Profits.

Trees

SCARLET RED STAYMAN
BRILLIANT COLOR
We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices
Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

FOR JUMBO APPLE TREES
SEE PAGE 17

Superior to all Other Tested Strains

PLANT BIG TREES for QUICKEST and BEST RESULTS

SOLID RED WINESAP
Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

THE APPALACHIAN WINNER
RED YORKING
(U. S. Plant Patent No. 125)
The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Ship-pensburg, Penna., for use in planting a large orchard about 40 years ago.

PRICE APPLE

Red Yorking—Big Crops

PLANT BIG TREES for QUICKEST and BEST RESULTS

SCORCH RED STAYMAN—Top with Many Growers

FOR JUMBO APPLE TREES

RED VARIETIES
Flavored Apples
HOME OR COMMERCIAL ORCHARDS

RED SPY—Bears Crisp, Juicy Apples

RED ROME BEAUTY
An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy Apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size Apples. The tree is a vigorous, strong grower, exceedingly hardy. Pacific Coast strain. Has always been very popular.

NEW STRAINS OF RED ROME
Can supply two new additional bud sport strains known as C. and O. Red Rome also C. and O. Rnn Rome number 262.

SUPER RED McINTOSH
A new strain of McIntosh Red that starts coloring earlier and produces a larger percentage of fancy fruits. Super-Red McIntosh, when allowed to mature on the trees, is slightly darker in color than our regular improved McIntosh Red. Has all the best qualities of ordinary McIntosh and will mean larger profits for growers who have been unable to get sufficient color. McIntosh has been the favorite in the North; this new strain extends the planting area farther South. The most highly colored solid red strain available, regardless of price. We have some exceptionally good one-year trees and fine two-year trees to offer this season. Plant McIntosh strain of Apples for big profits, equally as good in home orchards as it is commercially.

HARRISON BROTHERS NURSERIES, BERLIN, MARYLAND
BARTLETT PEAR
So Full of Juice
You Can Eat Them With a Spoon

1—Superb Quality
2—Heavy Cropper
3—For Home or Commercial Grower
4—For Eating and Canning
5—Bear Early
6—A Harrison Brothers Specialty

For home, for canning, for market, the best. Ripens during summer. A golden colored Pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall. Yet when picked a week before it is ripe and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest Pears that grows, to eat raw. A mingling of the flavor of Bartlett Pear and Quince gives about the finest taste of any food this world's folks have. Bartlett trees bear early, produce enormous crops, and are not nearly so subject to damage by insects and disease as some other sorts. The trees do especially well with high culture.

Fancy Bartletts Bring Highest Prices

Bartlett Pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack Apples. Pears are sometimes packed in Peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes. One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER
SURE CROPPER—EASY TO GROW

Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer and Koonce are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial Pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards. This fruit is large to very large size; skin yellow, with light vermilion cheek. Flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning Pear.

BEURRE BOSC. Large size, fine quality, brings highest market price. Late.
BEURRE D' ANJOU. Large, green in color, somewhat yellow when ripe. Buttery, melting, rich, vinous, good flavor. Very early.
CLAPP'S FAVORITE. Large size, hardy, and very productive. Thrives where other varieties fail. Very early.
DOUGLAS. Very resistant to blight. A winter Pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.
DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.
GORMAN. Flavor is sweet and vinous with a very marked and pleasing aroma. Flesh is white, tender, buttery and juicy. Valuable for dessert and canning. New.
KOONCE. One of the earliest Pears, tree from blight, does not rot at the core like many early Pears. Fruit is yellow, medium to large, delightful flavor. Very productive. Extra good for southern states.
SECKEL. A beautiful and delicious little Pear. One of the richest and highest flavored Pears grown. Tree dwarf, bears prolific crops. Late.
WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

HARRISON'S Profitable EASY TO GROW

Montmorency

The most popular Sour Cherry, grown in America for real satisfaction.

The best of all Sour Cherries; always commands a price in city markets or commissaries. When preserved at home, attractive in size and at extra good quality.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish red Cherry; Harvest and productive; Very late.

SWEET CHERRIES

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

BING. Very large, dark brown, firm, sweet, Midseason.

BLACK TARTARIAN. Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor. Heavy bearer and most profitable sweet variety grown. Early.

NAPOLEON. Royal Ann. Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.

SENICA. Resembles Black Tartarian, but ripens two weeks earlier, rich red flavor.

SCHMIDT. Schmidt's Bigarreau. Large, sweet, deep black, tender, fine flavor. Midseason.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

YELLOW SPANISH. Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light-colored Cherries. Heavy bearer. Late season.

HANSEN'S IMPROVED Bush Cherry

An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect.

3-Year Bushes, Bearing Size, $1.00 each; 10 for $9.00.
April 1912

HARRISONS
AMERICAS BEST
VARIETIES

ABUNDANCE. Early, large, color pinkish red chang- ing to darker red, with thin bloom. Yellow, very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BIG MACKY. Late. Largest and best Damson, be- ing an improved strain of Shropshire Damson. Freestone. Deep purple, rich flavor; small stone. Fine for preserving. Easy to grow, produces immense crops. Should be planted in every orchard. Large size fruit makes ideal jams, pre- serves and jellies. An excellent variety for fresh fruit shipments to city markets, always demanding high prices.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high qual- ity and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FORMOSA. A midsaison variety of excellent and prolific bearing qualities. Large greenish yellow, overlaid with red. Alternate bearer. Heavy crop- per.

ITALIAN PRUNE (Fellenberg). Late, medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE PRUNE. Late. Commercial variety. Purplish black, juicy, sweet, excellent for cooking.

LOMBARD. Midsaison. Medium size, showy pur- plish red fruit, excellent quality for canning, cook- ing, preserving or spicing. Prolific cropper.

BRADSHAW. Very large, fine early Plum; dark vio- let-red, juicy and good. Very productive; valued for canning, preserving or spicing. A prolific cropper.

Extra Good Fruits for The Home Garden

APRICOTS

The Apricot is one of the most delightful juicy fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early Cherries and before the best early Peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large, prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. A hard, prolific bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

MOORPARK. Midseason. Large, freestone; flesh yellow, sweet, juicy. Good for canning or drying. Dwarf type, medium size tree.

APRICOTS CAN BE GROWN ANYWHERE PEACHES SUCCEED

NECTARINES

Delicious for Eating

There is a mistaken idea that the Nectarine is a cross be- tween the Peach and something else, while it is really nothing more or less than a smooth-skinned Peach. The melting, juicy texture of the Nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

WATER. Large, round, yellow, freestone.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

PRICES ON APRICOT AND NECTARINE TREES

Budded, True-to-Name, 1 to 9 10 to 49 50 or 
Certified 100% Healthy Trees: $2.20 $1.80 $1.30

NECTARINES ARE DELICIOUS 

[19]
Grow Finer Flavored Berries

With Harrisons' Certified Raspberry Plants

LATHAM

WORLD'S LEADING RASPBERRY

Large Berries—Tremendously Productive

Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and feathery, highly resistant to insects. Latham ripens with Cuthbert, covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark, rich red.

HARRISON BROTHERS NURSERIES

BERLIN, MARYLAND

INCREASE YOUR PROFITS WITH HARRISONS' SELECTED BERRY PLANT
The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches in Length

NEW LOWER PRICES

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as Blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for $1.15; 6 for $2.05; 12 for $2.95; 25 for $4.65; 50 for $8.10; 100 for $14.05; 250 for $30.40; 500 for $48.85; 750 for $66.95; 1000 for $85.00.

Lucretia Dewberry

Long, mammoth black berries, recognized as the leading variety. Incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 Plants: 6 for $1.20; 12 for $1.75; 25 for $2.75; 50 for $4.75; 100 for $8.25; 250 for $17.80.

ELDORADO BLACKBERRY

A Heavy Yielding Blackberry that Spells Success Everywhere

The Heavy Yielding Variety. The heavy producing quality of Eldorado has placed it first among Blackberries. Every good quality possessed by other Blackberries is emphasized.

ELDORADO BLACKBERRY

RED JACKET. Big, roundish oblong berries, with a mild sweet flavor. Delicious for fancy desserts, salads, conserves, pies, etc. Bushes lovely as shrubs. Small, yellow bloom.

DOWNING (Green). Large greenish yellow variety favored for shipping and canning. Highly flavored. Large, 1-yr. bushes, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.

NEW LOWER PRICES OF BLACKBERRIES: Selected plants, 1-yr., No. 1 grade, 6 for $1.45; 12 for $2.10; 25 for $3.30; 50 for $5.70; 100 for $9.90; 250 for $21.40.

NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75¢ per quart—$400.00 per acre the third year. They are exquisitely mild, sweet and delicious, and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves in their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental

As an ornamental shrub the Blueberries cannot be surpassed. Full of lovely pink blooms, which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

BLUEBERRIES—Ornamental as well as fruitful
Jumbo Size—Bear First Year Planted

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear crops of luscious berries on your own grounds and are as easily grown as a shrub or Rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel, and Jersey.

Prices: Jumbo size 4-year-old, 2 to 3 ft., $2.50 each; 3 for $6.75; 10 for $20.00.

Harrison Brothers Nurseries
BERLIN, MARYLAND
HARRISONS' BIG YIELD GRAPE VINES

Harrison Brothers Selected Varieties Grapes

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

NIAGARA. White. Midseason. Best of the standard light colored Grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. Very hardy and productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

GRAPES—One of the Easiest Fruits to Grow

OFFER No. 22

2 Catawba, Red 2 Niagara, White 2 Concord, Blue

All for $2.70

ALL PURPOSE SPRAY

Spray your peach, apple, pear, plum, cherry, apricot and nectarine fruit trees with one pound of PARATHION (15% strength) powder, a sensational new insecticide, best for general use ever discovered, which will kill all insects, along with three pounds of WETTABLE SULPHUR, paste type preferred, for the control of Rot and other fungus diseases, to fifty gallons of water.

You can get excellent results by using this same spray on your shade trees, flowering trees, shrubs, evergreens, broadleaf evergreens, hedge plants, roses and small fruits.

For larger or smaller quantities of liquid spray, use the same proportions.

Parathion makes it easy to grow high quality fruits in your garden, home orchard as well as in commercial orchards.

We do not sell spray materials. Please apply to your local farm supply store.

For Bigger and Better Crops Plant

CONCORD

Harrisons' Super Strain

Blue, midseason. The most popular and extensively planted Grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

Exceptionally Heavy Yields

Concord is a very vigorous grower, hardy and very productive. It ripens during midseason, and is rated as the best money-making commercial variety.

SHIP TO ALL STATES

Every shipment has a certificate of inspection by Maryland and/or United States Department of Agriculture.

CUSTOMER REFERENCE

We refer you to any fruit grower in America who has planted Harrison-Grown fruit trees any time during the past 65 years.

Bank Reference—Calvin B. Taylor Banking Company, Berlin, Maryland; also Dun and Bradstreet.

For Quick Crops Plant

JUMBO GRAPE VINES

Big crops of luscious Grapes, some the first season planted. No other fruit bears so much for so little attention. Our Jumbo Grape Vines have already fruited in the nursery.

We can furnish the following varieties only in Jumbo size; listed in their order of ripening: Fredonia, Worden, Concord, Agawam, Niagara, Catawba.

Prices: 90c each; 3 for $2.40; 6 for $4.20; 10 for $6.50; 25 for $13.75; 50 for $25.00.
Pick World's Finest Strawberries From Your Own Plants

A Big Profit From Your Own Back Yard

Everybody prefers the flavor of vine-ripened Strawberries. They are more succulent and usually sell for $1.50 to $2.50 more per quart. Customers pay you more for fresh Strawberries and small growers make real money from their own back yards.

A Triple Yield

1—Plant this Spring.
2—Pick first crop, July to frost.
3—Pick second crop, June next year.
4—Pick third crop, August to frost next year.

3 REAL CROPS—3 BIG PROFITS

Bears in 90 days, and, too, it's the Best Family Garden Strawberry—Loads of Big Berries in 90 days.

CEM EVERBEARING—Widely adaptable to different soils. Large, luscious berries of excellent quality. You will really like Cem.

MASTODON EVERBEARING—On proper soil, Mastodon gives big yields of large, fine quality berries.

SUPERFECTION EVERBEARING—Makes plants very freely, good flavor, worthy of a trial planting.

STRAWBERRY GARDEN OFFER
No. 20
25 BIG JOE 25 PREMIER
25 FAIRLAND 25 TEMPLE
ALL FOR $3.75

BLAKEMORE
No Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable, producing big crops every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and preserving because it holds its color and shape so well.

DORSETT, Early
Large Fruit—Vigorous Grower—Heavy Crops
Dorsett berries average large size, considerably larger than the Premier; in fact, their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, being far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

FAIRLAND
Ripens a few days after Premier, vigorous grower, firm, large berry. A cross between Fairfax and Aberdeen. Rich, sweet flavor. Highly resistant to diseases and easy to grow.

FAIRFAX
Ripens about same time as Premier, large, extra firm, sweet berry. Turns dark after being picked but still retains flavor.

PREMIER
King of the Early Berries
Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big cross and big profits. Premier has filled more crates, made more dollars, and brought joy to more Strawberry growers than any other variety ever grown.
Adapted to All Soils—Heavy Yields. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home gardens, local markets, or for shipping moderate distances it has outsold all the other varieties.

Here is the Easiest Berry to Grow

TEMPLE
The Successful New Variety—Can Be Grown Anywhere.
If you have ever tried raising Strawberries and failed, here is the berry for you to try. It will grow on light, sandy soil as well as heavy, water-soaked kinds. The quality of this berry is excellent and its plant growing characteristics are supreme. Berries are extra large, firm, beautiful in appearance, fine texture and flavor. Excellent for freezing, canning, eating fresh, also local and long distance shipments. This berry is the result of years and years of cross-breeding work and is unquestionably the finest new berry for both commercial and home plantings that has been introduced in many years. It has our highest recommendation.

Harrison Strawberry Plants Are Bred Up for Bigger Yields and Tell the Story at Harvest Time.
EVERBLOOMING HYBRID TEAS

ETOILE DE HOLLANDE

This popular Hybrid Tea is a most mellow pink, quite at home in any group and one of the loveliest flowered roses. A long blooming season.

Harrisons' Budded Roses are the Best Why Pay More?
SPREADING YEW

The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardy of all Yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. Prices: 12 to 15 inch $2.50 each.

GOLDEN RETINOSPORA

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Featherly, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen. Price: 12 to 15 inches $2.00.

COMPACT GLOBULAR ARBOR-VITAE

Natural compact, globe-shaped, dark green foliage. The ideal low growing plant for massing against the taller evergreens in foundation plantings. Price: 12 to 15 inch $2.00.

AMERICAN ARBOR-VITAE

Probably no evergreen is more admired than American Arbor-Vitae with its beautifully carved foliage of deep green, its graceful, refined habits and its artistic upright shape. These features make it indispensable in the home foundation groups and in the lawn and garden plantings. Price: 18 to 24 inch $2.50 each.

IRISH JUNIPER

Forms a narrow and dense column, compact, bluish green foliage. Most attractive when planted around the foundation of a home at corners and entrances. Price: 18 to 24 inch $2.50 each.

All evergreens are shipped with Moss on the Roots.

American BOXWOOD

GROWN BY HARRISON BROTHERS BERLIN, MARYLAND

—the real Aristocrat of the Evergreen family

YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISONS'

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

Let's Plant More

AMERICAN BOXWOOD
(Buxus Sempervirens)

A BROTHER OF "YE OLDE ENGLISH" BOXWOOD
—It Grows Much Faster

PRICES OF AMERICAN BOXWOOD
10 to 12 inches $1.50 each; 10 for $12.50

IRISH JUNIPER
AZALEA HINODEGIRI
Deep Coral-Pink Flowers

Azalea Hinodegiri is a dwarf grower with evergreen foliage. In the spring it produces a profusion of deep coral colored blossoms, completely hiding the foliage. Ideally suited for planting around the foundation of homes or adding color in front of evergreens. Grows well in the shade or sunlight.

CRPE MYRTLE (Lagerstroemia Indica). Small green, glassy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1½ to 2 ft., $1.50 each.

HYDRANGEA PEE GEE (Hydrangea Paniculata Grandiflora). Large flowers; snowy white, then pink, changing to reddish bronze in the fall. Grows well in the shade or sunlight.

CRPE MYRTLE (Lagerstroemia Indica). Small green, glassy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1½ to 2 ft., $1.50 each.

2 to 3 feet ... $0.80 2.25
3 to 4 feet ... $1.00 2.85

SYRINGA, SWEET MOCK ORANGE or GARLAND (Philadelphus Coronarius). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (Calycanthus Floridus). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and wood have a spicy fragrance.

TAMARIX, AFRICAN (Tomarix Africana). Feathery gray-green foliage; very showy.

TARTARIAN HONEYSUCKLE (Lonicera Tatarica). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (Weigela Rosea). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

PAPER SHELL PECAN
Medium to large nuts; oblong thin shell; rich, spicy flavor. Good grower. The best type Pecan grown. 2 to 3 ft., $2.75 each; 3 to 4 ft., $3.75 each; 4 to 5 ft., $4.75 each.

BLACK WALNUT
(Juglans nigra) Rapid grower, spreading branches, large delicious nuts, prolific bearer. 2 to 3 ft., $2.00 each.

PECANS—Abundant Nuts in Winter

**NORTHERN STRAIN**

**CHINESE ELM**

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except that leaves are smaller, with the gracefulness of a Cut-Leaf Birch. Prices: 5 to 6 ft. $1.75 each; 6 to 8 ft. $2.25 each.

**ORIENTAL PLANE**

*Platanus Orientalis)*

A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. The Oriental Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrisons' Nurseries are specializing in growing Oriental Planes and we are the largest growers in America. Prices: 6 to 8 ft. $3.50 each; 8 to 10 ft. $5.00 each; 10 to 12 ft. $7.00 each; 12 to 14 ft. $11.00 each.

**AMERICAN ELM**

(*Ulmus americana)*. A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a tall vase. Prices: 5 to 6 ft. $1.75 each; 6 to 8 ft. $2.25 each.

**LOMBARDY POPULAR**

A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. Prices: 5 to 6 ft. $1.00 each; 6 to 8 ft. $1.50 each.

**NORWAY MAPLE**

Typical Maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Prices: 6 to 8 ft. $4.00.

**CHINESE CHESTNUTS**

Now You Can Grow Chestnuts! Blight-Resistant Chestnut Trees

Only two years from this fall, right in your own grounds, you can pick big, fat, tasty Chestnuts from the trees you plant this year! Remember gathering Chestnuts in the good old days—haven't you felt so sorry for your children because they couldn't? The devastating blight that stripped our forests of the native Chestnut was an American tragedy! Now these hardy, blight-resistant Chestnut trees will bring them back. More than that, you need not wait 15 to 20 years for nuts—they'll bear year after year!

Plant in abundance Harrisons' strain of Chinese Chestnut Trees.

**PRICES:** 2 to 3 ft., $2.50 each.

**AMERICAN FILBERT**

(Hazel Nut)

Old family favorite. Small, attractive bush, producing abundant crops of tasty, round nuts. Bears very young.

**PRICES:** 2 to 3 ft., $2.00 each.

**ENGLISH WALNUT**

(Juglans Regia)

Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

**PRICES:** 2 to 3 ft., $2.75 each.

**CHINESE ELM—Quickest Growing Tree in the World**

**WEEPING WILLOW**

A rapid growing, hardy tree, thriving in any moist soil. The Willows are valuable and interesting subjects on account of their graceful aspect. Prices: 5 to 6 ft. $1.50 each; 6 to 8 ft. $2.25 each.

**ENGLISH**

**AMERICAN WALNUT**

FILBERT (Juglans Regia)

Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

**PRICES:** 2 to 3 ft., $2.75 each.
GREEN BARBERRY—Green in the summer, turning to a brilliant coppery red in autumn. A protection against small animals, because of the sharp thorns.

HEDGES Beautiful living fences

California Privet is the Leading Low Cost Hedge Plant

CALIFORNIA PRIVET (Ligustrum ovalifolium)
This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For live fences at village, town and country homes it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be easily kept at any height upright growth makes it useful for screening out unsightly objects.

Extremely hardy and requires but little pruning. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

RED-LEAVED BARBERRY
(Berberis Thunbergi Atropurpurea)
A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out in any shrub foliage depended on for color. Red berries during winter.
